

Goshawk Boulevard Extension Concept Design

March 2026

Goshawk Boulevard Extension concept design

Sunshine Coast Council is planning to extend Goshawk Boulevard in Buderim 700 metres east to connect Stringybark Road to Power Road. This missing link in the Sippy Downs and Buderim transport network, will ease congestion and make it easier for people to travel around their local community.

The extension is planned to deliver one vehicle lane in each direction, a dedicated two-way riding path, walking paths and landscaping.

From 3 to 28 November 2025, Council invited the community to provide feedback on the draft concept design for the Goshawk Boulevard extension.

This awareness campaign informed the community and key stakeholders about the project and proposed concept design, as well as encouraging participation in the consultation process. Community engagement included the Have your Say survey on Council's website, digital advertising, social media, project emails, and a letterbox drop.

An overview of awareness activities is outlined below.

What you told us

Around 70per cent of survey respondents currently travel through the area at least daily, with nearly 80per cent experiencing delays in Buderim, Sippy Downs and the surrounding network. Many participants agreed traffic is a problem in the local area and recognised a need for a solution.

Key areas of interest identified by the community included:

- reduced traffic congestion
- optimised traffic flow
- improved walking and riding opportunities
- improved connectivity
- protection of the surrounding environment
- access to adjacent residential properties and surrounding streets
- residential amenity during potential future stages
- requests for more information about potential future stages.

Community feedback also highlighted the need to reduce construction impacts and to make sure the extension does not worsen existing traffic congestion in nearby streets.

Next steps

Thank you to everyone who shared their feedback.

Council is now analysing feedback on the concept design and will use this information to inform the detailed design. The detailed design is expected to be undertaken in 2026.

Goshawk Boulevard is proposed to be extended before, or in conjunction with any development on the vacant land at 77 Power Road, Buderim. Exact timeframes for construction are subject to future budget allocations
