

Mooloolaba to University (M2U) Active Transport Projects Update

- **Stage 3 - Karawatha Drive, Mountain Creek**
- **Stage 2 - Molakai Drive, Mountain Creek**

Additional pop-up information session

Following our Project News of 23 June 2026, we know there is a lot of community interest in the M2U active transport link.

We have added another pop-up information session to share with you the proposed revised design.

You're invited

We are now planning two pop-up information sessions:

- **Saturday 4 July 2026, 9:30am - 11:30am** at Mountain Creek Woolworths (corner of Golf Links Road and Karawatha Drive).
- **Saturday 11 July 2026, 9:30am - 11:30am** at Mooloolaba Tennis Club (112 Lady Musgrave Drive).

Come along to hear about the proposed revised design at these community information sessions.

About the project

The proposed project will improve accessibility, connectivity and safety for people walking and riding through the popular neighbourhood.

Following extensive community engagement, feedback has been used to revise the design to retain most of the on-street parking.

We are proposing to upgrade the existing path to a wider shared path on Karawatha Drive and a new pathway along Molakai Drive. Sections of path will be improved along both streets where required.

Extent of works

View the proposed works overpage:

- **Stage 2 (Blue Section):** Lady Musgrave Drive to the Molakai Drive/Karawatha Drive intersection (see page 3 for proposed concept design).
- **Stage 3 (Orange Section):** Molakai Drive/Karawatha Drive intersection to the Golf Links Road roundabout (see page 4 for proposed concept design).

Timing of works

Concept designs are expected to be completed by August 2026. Construction is planned to start in late 2026 and is scheduled for completion by 30 June 2027, subject to weather and site conditions.

We will issue another newsletter closer to construction starting outlining construction details and timing.

You can also ask any questions by contacting the project team using the details over the page. We will continue to keep our community informed as the project progresses.

A note from your local councillor

Following significant community feedback, particularly from directly impacted residents, Council has revised the project to address key concerns. Updates include retaining most of the on-street parking, improving rubbish collection access, enhancing safety for riders and commuters, and introducing raised pedestrian crossings. While the revised design is expected to gain broader support, we acknowledge it may not suit everyone. Council has worked to strike a balanced outcome that improves safety while responding to community input.
