Further information

For further information about this project, please contact Council's design team at InternetMailbox.DesignServices@sunshinecoast.qld.gov.au stating project number: P-H4861 Stringybark Road - Active Transport Link.

Mooloolaba to University (M2U) Active Transport Projects

- **Stage 6 - Stringybark Road, Buderim**

About the project

Sunshine Coast Council is progressing planning and design for Stage 6 of the Mooloolaba to University (M2U) Active Transport Corridor along Stringybark Road, Buderim.

The project will improve safety, accessibility and connectivity for people walking, riding, pushing prams, using mobility aids, wheelchairs and scootering through this popular suburb.

Following extensive community feedback, we revised the proposed design from a separated off-road cycle track and pedestrian path to a 3-metre-wide shared path. The updated design will provide a safe and accessible path for all users, improve connections across the local active transport network, reduce impacts on vegetation and existing on-street parking, and create a consistent path design with other sections of the M2U corridor.

The shared pathway will be delivered with new raised crossings at side roads along Stringybark Road.

Extent of works

Please refer to Figure 1 over the page for the location and scope of works.

Next steps

During the design investigation phase, you may see contractors on site completing early works such as surveying, locating underground services, geotechnical investigations and environmental site inspections.

These investigations are expected to continue until March 2027 and are not expected to cause significant disruption.

The design component of the Stringybark Road Active Transport Link is proudly supported by the Queensland Government's Cycle Network Local Government Grants Program.

A note from your local councillor

Please provide your feedback to progress the planning for this vital transport link. This gives our planners important information to feed into their final design planning.
