

MoveSafe Division 3 Update

17/05/2024

Thank you to everyone who participated in our pilot MoveSafe Active Transport – Division 3 project last year.

We asked you to highlight locations where improvements to active transport facilities were needed in the Currimundi area.

Results

- We distributed 23,247 email invitations.
- We spoke to 50 people at our community stalls.
- We received 597 comments on our interactive online map with 1515 “upvotes”.

Key themes were identified as Currimundi Lake and e-scooter behaviour. Hot spots were identified as Currimundi State School and the Coastal Pathway.

Our top 3 feedback items were:

1. New or wider pathways
2. Safer crossings
3. Better on-road bicycle facilities.

We are listening and acting.

As a result of the feedback received, we have identified 85 comments relating to maintenance of pathways, lighting, signals, vegetation, and roads. We have distributed this feedback to the relevant internal teams, and they are currently working through the comments and actioning as required.

We have identified 20 priority capital works projects that have been investigated and are now being reviewed for suitability for our 10-year capital works program.

In September 2024 we are implementing a pathway behaviour education campaign “Mind if we share” to promote respectful pathway etiquette and awareness of new rules.

Our next steps are to consider if the pilot program can be continued in other divisions.
